

Management’s Discussion and Analysis

For the nine months ended September 30, 2020

Date of Report: November 27, 2020

Overview:

This Management’s Discussion and Analysis of the financial condition and results of operation (“MD&A”) of 49 North Resources Inc. (the “Corporation” or “49 North” “we” or “us”) has been prepared based upon information available to the Corporation as at November 27, 2020 and should be read in conjunction with the condensed interim financial statements and the notes thereto as at and for the nine months ended September 30, 2020 and the audited consolidated financial statements and notes thereto as at and for the year ended December 31, 2019. All financial data in this MD&A is reported in Canadian dollars, is stated in thousands of dollars and has been prepared in accordance with International Financial Reporting Standards (“IFRS”).

Caution Regarding Forward-Looking Information:

Certain information contained in this MD&A may constitute forward-looking information, which is information regarding possible events, conditions or results of operations of the Corporation that is based upon assumptions about future economic conditions and courses of action and which is inherently uncertain. All information other than statements of historical fact may be forward-looking information. Forward-looking information is often, but not always, identified by the use of words such as “seek”, “anticipate”, “budget”, “plan”, “continue”, “estimate”, “expect”, “forecast”, “may”, “will”, “project”, “predict”, “potential”, “targeting”, “intend”, “could”, “might”, “should”, “believe” and similar words or phrases (including negative variations) suggesting future outcomes or statements regarding an outlook. Forward-looking information contained in this MD&A includes, without limitation, our expectations regarding anticipated investment activities and results and financing activities and other factors on our operating results, and the performance of global capital markets and interest rates.

Forward-looking information involves known and unknown risk, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking information. The Corporation believes the expectations reflected in the forward-looking information are reasonable but no assurance can be given that these expectations will prove to be correct and readers are cautioned not to place undue reliance on forward-looking information contained in this MD&A. Some of the risks and other factors which could cause results to differ materially from those expressed in the forward-looking information contained in this MD&A include, but are not limited to: risks relating to investment performance and our ability to generate taxable income from operations, market fluctuations, fluctuations in prices of commodities underlying our interest and equity investments, the strength of the Canadian, U.S. and other economies, foreign exchange fluctuations, political and economic conditions in the countries in which the interests of the Corporation’s portfolio investments are located, and other risks included elsewhere in this MD&A under the headings “Risks” and “Financial Instruments” and in other public disclosure documents filed with certain Canadian securities regulatory authorities and available under the Corporation’s profile at www.sedar.com.

Readers are cautioned that the foregoing lists of factors are not exhaustive. Although the Corporation has attempted to identify important factors that could cause actual events and results to differ materially from those described in the forward-looking information, there may be other factors that cause events or results to differ from those intended, anticipated or estimated. The Corporation undertakes no obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise, excepts as otherwise required by law. All of the forward-looking information contained in this MD&A is expressly qualified by this cautionary statement.

Nature of the Business:

49 North Resources Inc. is a corporation under the laws of Saskatchewan whose common shares are listed on the TSX Venture Exchange (“TSXV”) under the trading symbol “FNR”. It is a reporting issuer in all of the provinces and territories of Canada.

49 North is a resource investment, financial and managerial advisory corporation which, as its principal business, invests in a diversified portfolio of common shares and other securities of resource issuers.

49 North’s principal business is to acquire and aggressively manage a diversified portfolio of shares and other securities of resource companies including, without limitation, resource companies engaged in mineral or oil and gas exploration and development, with a view to achieving capital appreciation in the portfolio.

The overall business strategy of the Corporation is to enhance shareholder value by positioning 49 North to take advantage of early stage and/or undervalued opportunities that exist in the resource sector.

Overall Performance:

The economic climate for the junior resource sector in 2019 and the first nine months of 2020 remained highly volatile and relatively illiquid. The TSXV reached a high of 642 at the beginning of 2019 and consistently pulled back to close 2019 at 577. In fiscal 2020 the TSXV recovered to a high of 761 in August and has consistently remained at this level until the later part of September with a slight pull back closing the quarter at 706. The volatility in the junior resource markets continues, in large part, to be lead by increased gold price and by a decrease in commodity prices resulting from the United States levying tariffs on many base metals. The tariffs being levied by the United States has sparked retaliatory tariffs being levied by China, which is starting to constrain the Global economy. Fears of an economic downturn and a decrease in treasury yields have fueled a significant increase in the gold price the increase in gold price was further enhanced through the worlds financial response to COVID-19. Despite the double bottom in the TSXV, the elevated gold price has heightened attention of gold producers and explorers, sparking rumors of additional merger and acquisition transactions. The price of gold continues to provide liquidity in gold stocks and enable the Company to purchase shares at deeply discounted prices, in anticipation of a commodity price recovery.

Consistent with Managements beliefs, the upward trend previously experienced has pulled back and recovered. Management still believes that this moderate return to favor for risk investments represents the beginnings of a more formal market turn in the junior resource space.

In the medium and longer term, basic supply and demand metrics underlying the investments that the Corporation holds will return and will begin to move share prices upward and increase liquidity in the junior resource space. As major active mining projects continue production, a need for reserves and resources in the ground will once again drive the exploration space upward in the long-term.

The Corporation realized net losses on the sale of equity investments in the period of \$508, as well as unrealized gains in equity investments of \$17,610. The unrealized gains are a function of the gold price discussed above.

The Corporation continues to aggressively manage the portfolio of investments, and continues to redeploy capital received from the realization of early stage investments in a number of new investments, in accordance with the business plan, with the goal of repeating this cycle.

Management used the depressed markets experienced beginning in Q2 of 2011 to increase positions in promising companies and enter new companies that are well positioned for the next commodity up-cycle.

As at September 30, 2020 the fair value of the Corporation's investment portfolio was \$23,561 as compared to \$6,945 as at December 31, 2019 (a 239% increase) and shareholders' equity was \$24,456 compared to shareholders' equity of \$7,668 as at December 31, 2019. These changes are the result of changes in the market value of our portfolio of public and private company shares.

Despite any short-term volatility, 49 North remains committed to its investment strategy and long-term objectives. The Corporation believes that the cyclical nature of the junior resource public markets presents a substantial opportunity to generate gains in future periods. The Corporation will continue to be active investors in quality resource companies managed by qualified and experienced project developers, as we expect to see a continued upward trend in stock and commodity prices in the next 12 - 24 months as a result of increasing global demand for base and precious metals, energy, alternative energy, potash and industrial minerals.

Significant Events:

None

Events after the reporting period:

The Company received notification that it was in default of the Trust indenture dated May 27, 2015 as it had not repaid the principal portion of the convertible senior secured debentures that matured on June 1, 2020.

As outlined in the June 1, 2020 press release, the Company announced its intention to amend seek approval from the debenture holders to extend the maturity date three (3) years and to amend the conversion price from \$0.50 to \$0.20. At the meeting held on September 28, 2020, the minimum requisite quorum was not met and the meeting was adjourned to November 27, 2020.

Off balance sheet arrangements:

None

Results of Operations:**Summary of Results:**

The Corporation's operating results for the nine months ended September 30, 2020 and the years ended December 31, 2019, and 2018 is stated below; with the subsequent table representing selected quarterly results for the eight most recently completed quarters.

Results of Operations	September 30, 2020	December 31, 2019	December 31, 2018
	In \$000's except per share data		
Revenues	\$18,136	\$3,191	\$(3,344)
Net income (loss)	16,777	191	(5,209)
Earnings (loss) per share – basic	0.20	0.00	(0.08)
Earnings (loss) per share – diluted	0.19	0.00	(0.08)
Total assets	32,432	14,833	13,507
Total liabilities	7,976	7,165	6,155
Shareholders' equity (deficiency) and non-controlling interest	24,456	7,668	7,352

Nine Months Ended September 30, 2020 and 2019:

For the nine months ended September 30, 2020, the Corporation recorded net income of \$16,777 (\$0.20 per share), compared to a net loss of \$431 (\$0.01 loss per share) for the nine months ended September 30, 2019.

For the nine months ended September 30, 2020, the Corporation's pre-tax income of \$16,777 was based on revenues, gains and other income of \$18,136 less recorded expenses of \$1,359 compared to the nine month period in 2019 pre-tax loss of \$431 on revenues, gains and other income of \$967 less expenses of \$1,398. The net change in pre-tax loss year over year is the result of significant realized and unrealized changes in equity investments.

The \$18,136 of revenues in the first nine months of 2020 is comprised of \$508 of realized equity investment losses, \$17,610 of unrealized equity investment gains, \$473 unrealized gain on convertible debenture receivable, and \$561 of interest and dividend income. By comparison, in the first nine month of 2019, the Corporation had \$524 of interest and dividend income, \$84 of realized equity investment gains, \$211 of unrealized equity investment gains, and \$18 unrealized gains on convertible debenture receivable. The realized investment gains in the first nine months of 2020 were attributable to both selling investments to fund operations, the strategy of consistently reviewing and monitoring the investments the Corporation holds in the portfolio.

Expenses for the nine months ended September 30, 2020 were \$1,359, compared to \$1,398 in the nine months ended September 30, 2019. The following table provides a list of all expenses incurred by the Corporation for the nine months ended September 30, 2020 and 2019. Additional information about these expenses, including the main reasons for period to period changes in expenses, is provided in the notes to the table.

	Nine Months Ended September 30	
	2020	2019
Amortization and depletion ¹	71	9
Business development and investor relations ²	68	91
Wages and benefits ²	15	23
General and administration ²	157	229
Finance ³	478	516
Management fees ⁴	541	321
Professional fees ⁵	23	83
Transaction costs ⁶	6	7
Share based compensation ⁷	-	119
	\$ 1,359	\$ 1,398

Notes:

1. In the current period amortization is related to the amortization of the Corporation's leasehold improvements and capital assets at its corporate office.
2. Business development and investor relations costs, wages and benefits, general and administration expenses totaled \$240 in the first nine months of 2020. The business development and general expenses decreased \$95 from the first nine months of 2019 due to increased monitoring and managing of such expenses.
3. Finance expense consists of interest and accretion on the Corporations convertible debentures of \$478 for the first nine months of 2020 compared to \$516 in the first nine months of 2019.
4. The management fees expense for the first nine months of 2020 was \$541 compared to \$321 in the first nine months of 2019. The increase relates to the TMM management fee arrangement and the significant increase in the Corporation's net assets.
5. Professional fees for the first nine months of 2020 were \$23, a decrease of \$60 from the first nine months of 2019. The decrease is attributable to both the number of and the timing of when the Corporation is involved in transactions requiring professional consulting services.
6. Transactions costs in the first nine months of 2020 was consistent with the first nine of 2019. Transaction costs arise from purchases and dispositions of investments through brokerage accounts, which are expensed immediately in accordance with the Corporation's accounting policy for investments.
7. Share based compensation in the first nine months of 2020 is nil compared to \$119. The change is the result of the Company issuing options in 2019 but not in 2020.

The Corporation recorded \$nil income tax in the first nine months of 2020 and 2019.

Quarterly results of operations (unaudited)				
In \$000's except per share data	Three Months Ended			
	Sept 30, 2020	June 30, 2020	Mar 31, 2020	Dec 31, 2019
Revenues	\$ (6,825)	\$24,961	\$3,112	\$2,223
Net income (loss) for the period	(7,242)	24,019	2,681	620
Earnings (loss) per share - basic	\$(0.09)	\$0.26	\$0.03	\$0.00
Earnings (loss) per share – diluted	\$(0.09)	\$0.26	\$0.03	\$0.00
	Sept 30, 2019	June 30, 2019	Mar 31, 2019	Dec 31, 2018
Revenues	\$(856)	\$(924)	\$2,748	\$(989)
Net income (loss) for the period	(1,245)	(1,503)	2,319	(1,382)
Earnings (loss) per share - basic	\$(0.01)	\$(0.02)	\$0.03	\$(0.02)
Earnings (loss) per share – diluted	\$(0.01)	\$(0.02)	\$0.03	\$(0.02)

Three Months Ended September 30, 2020 and 2019:

For the three months ended September 30, 2020, the Corporation recorded net loss of \$7,242 (\$0.09 loss per share), compared to a net loss of \$1,245 (\$0.01 loss per share) for the three months ended September 30, 2019.

The Corporation's pre-tax loss in the third quarter of fiscal 2020 of \$7,242 was based on revenues, gains and other income of \$(6,825) less recorded expenses of \$417 compared to a 2019 pre-tax loss of \$1,245 on revenues and gains of \$(856) less expenses of \$389. The net change in pre-tax income year over year is the result of increased net losses on equity investments offset by unrealized gain on convertible debenture receivable.

The \$(6,825) of revenues in the third quarter of 2020 is comprised of \$191 of interest and dividend income, \$249 of realized equity investment losses, \$6,867 of unrealized equity investment losses, \$100 unrealized gain on convertible debenture receivable. By comparison, the Corporation had \$(856) of revenues in the third quarter of 2019 comprised of \$2178 of interest and dividend income, \$221 of realized equity investment losses, \$641 of unrealized equity investment losses, and \$172 unrealized loss on convertible debenture receivable. The realized investment losses in the third quarter of 2020 were attributable to both selling investments to fund operations, the strategy of consistently reviewing and monitoring the investments the Corporation holds in the portfolio.

Expenses for the three months ended September 30, 2020 were \$417, compared to \$389 in the three months ended September 30, 2019. The change between the periods is related to the increase in management fees partially offset by decrease in finance expenses. All other expense categories were consistent between the period and comparable period.

Cash Flow:

Nine Months Ended September 30, 2020 and 2019:

Net cash provided in operating activities in the first nine months of 2020 was \$38 compared to net cash provided of \$390 in the first nine months of 2019, an decrease in cash generated of \$352.

Net cash used in investing activities in the first nine months of 2020 was \$28 compared to net cash used of \$415 in the first nine months of 2019. The change is attributable to the Corporation receiving repayment of loans advanced previously compared to providing loans and other advances receivable in 2019.

Net cash provided by financing activities was \$nil in the first nine months of 2020 and 2019.

For the nine months ended September 30, 2020 the Corporation generated \$10 in net cash compared to \$25 cash used in the same period of 2019.

Capital Resources:

Assets:

49 North's principal business is to invest in and manage a diversified portfolio of securities of resource companies with the objective of achieving medium to long-term capital appreciation through the aggressive management of and growth in value of the portfolio. At September 30, 2020, the Corporation had total assets of \$32,432, approximately 73% of which consisted of direct equity investments in a total of 61 resource companies.

In addition to its equity investments, as at September 30, 2020 the Corporation had other recorded assets totaling \$8,871 (December 31, 2019 – \$7,888). Of the other assets, \$642 relates to loans and advances receivable and \$7,906 relates to the convertible debenture receivable. The remaining assets are comprised of cash of \$61, accounts receivable and prepaid expenses of \$26 and property, plant and equipment of \$30 and right of use asset of \$206.

Investment Portfolio:

49 North may invest in securities of any resource corporation regardless of if or on what stock exchange such securities are listed, regardless of the status or stage of development of the investee corporation's exploration, development or other business activities, and regardless of the size or market capitalization of the investee corporation. However, our portfolio focuses on junior and intermediate resource companies, with funds invested predominately in resource companies that are listed on the TSXV or other junior exchanges; although a significant portion of the portfolio, by value, may also be invested in TSX listed companies. Additionally, a significant portion of our portfolio may at any time or from time to time be invested in unlisted securities, including securities acquired under private placements of what are commonly referred to "founder's shares" or "seed-capital shares", securities that may otherwise be issued by a resource corporation prior to completing feasibility studies including, without limitation, a Form 43-101 Technical Report or a Form 51-101 F1 Statement of Reserves Data, or securities that may otherwise may be issued prior to a resource corporation becoming a "reporting issuer".

There are no fixed restrictions or requirements as to the particular sectors of the resource industry in which we invest and no fixed restrictions or requirements as to the geographical locations in which investee resource companies conduct their exploration and/or development activities. However, the Corporation tends to focus on resource companies with activities in Canada and our portfolio has historically been weighted more to mineral exploration companies than to oil and gas companies. We endeavor to diversify the portfolio based on commodity type. As described in more detail in the tables below, as of September 30, 2020, our portfolio included holdings in companies in the oil and gas, coal, precious metals, base metals, uranium, diamonds and other resource sectors.

The resource equity investments held by the Corporation as of September 30, 2020 - valued at \$23,561 represents a \$16,616 increase compared to the equity investments of \$6,945 as at December 31, 2019. The total number of investments held by the Corporation at September 30, 2020 increased by 1 from December 31, 2019.

The Corporation continues to be active in the market acquiring shares of companies that it feels are undervalued, specifically in this period where junior resource issuers have been continually de-valued for 5 years.

At September 30, 2020 and December 31, 2019, the Corporation's equity investments consisted of the following, grouped by resource type:

	September 30, 2020			December 31, 2019		
	Cost	Fair Market Value	% of Portfolio	Cost	Fair Market Value	% of Portfolio
Base and precious metals	11,987	20,421	86.7%	13,052	4,131	59.5%
Coal	1,981	-	0.0%	1,981	-	0.0%
Diamonds	672	588	2.5%	704	1,226	17.7%
Oil & Gas	11,035	824	3.5%	11,035	138	2.0%
Other	3,136	1,720	7.3%	3,034	1,445	20.8%
Uranium	148	8	0.0%	148	5	0.0%
Total	\$ 28,959	\$ 23,561	100%	\$ 29,954	\$ 6,945	100%

At September 30, 2020, 49 North's portfolio included positions in 61 resource companies, diversified on the basis of what, if any, stock exchange such companies are listed upon and by commodity type as summarized in the tables below (in '000's):

Exchange Listings of Portfolio Holdings						
Exchange	At September 30, 2020			At December 31, 2019		
	No. of Companies	Value (\$)	% of Portfolio	No. of Companies	Value (\$)	% of Portfolio
TSXV	32	21,531	91.39%	33	4,116	59.27%
Private	15	1,318	5.59%	14	1,304	18.77%
TSX	1	588	2.50%	1	1,226	17.66%
CSE	1	124	0.52%	1	299	4.30%
Defunct/Delisted	12	-	0.00%	11	-	0.0%
TOTAL	61	\$23,561	100%	60	\$6,945	100%

Valuation of Assets:

At September 30, 2020, the Corporation's assets included equity investments having a fair value of \$23,561, representing approximately 73% of the Corporation's total assets. These equity investments are classified as financial instruments held-for-trading and, in accordance with IFRS, are presented in the financial statements and measured at fair value, with changes in fair value recognized in net income. For this purpose, the fair value of a financial instrument is the amount of consideration that would be agreed upon in an arm's length transaction between knowledgeable, willing parties who are under no compulsion to act. Fair values are determined by reference to quoted bid or ask prices, as appropriate, in the most advantageous active market for that instrument to which the Corporation has immediate access. Where bid and ask prices are unavailable, the Corporation uses the closing price of the most recent transaction for that instrument. The fair value of securities in the Corporation's investment portfolio as at the end of a period are determined as follows:

Publicly traded companies. The fair value of any security which is listed or traded upon a stock exchange is estimated by taking the latest bid price. The quoted bid price value of securities that are subject to a hold period will be valued with an appropriate discount. The market values can be impacted by trading volumes, restrictions and market price fluctuations, and the quoted market price may not be indicative of what the Corporation could realize on the immediate sale as it may take an extended period of time to liquidate positions without causing a significant negative impact on the market price.

Privately held companies. The fair value of any shares which are not listed or traded upon a stock exchange are originally recorded at cost, unless the shares are flow-through shares, in which case they are originally recorded either on an assessment of the most recent price at which the investee corporation issued common equity without flow-through characteristics or at managements estimated fair value. After the initial transaction, adjustments are made to reflect any changes in value as a result of an independent third-party transaction. Downward adjustments to the carrying values are also made when there is evidence of a decline in value, as indicated by an assessment of the financial condition of the investment based on operational results, forecasts and other developments.

Options and Warrants. Options and warrants which are not traded on a recognized securities exchange, have no market value readily available. When there are sufficient and reliable observable market inputs, the warrants are valued using the Black-Scholes option pricing model. If no such market inputs are available or reliable, the warrants are valued at intrinsic value.

Liabilities:

At September 30 2020 the Corporation had recorded liabilities of \$7,976 (December 31, 2019, \$7,165). These liabilities include the following:

- Accounts payable and accrued liabilities of \$1,520 consisting of accruals for normal operating expenses, professional fees and interest payable on convertible debentures.
- \$227 Lease liability related to the long term lease for the corporate office.
- \$6,229 representing the redemption price (less the equity component) as at the end of the period on the aggregate principal amount of the convertible and subordinate debentures and the debt component of preferred shares issued in September 2010, June 29, 2011 and July 11, 2011 and restructured on June 10, 2013 and again on May 18, 2015 and December 18, 2015. Refer to Notes 9 and 10 of the current financial statements for a detailed description of the terms of these debentures. See discussion on convertible debentures in significant events section.

Liquidity and Capital Management:

Management's objectives when managing the Corporation's capital are:

- (a) To allow the Corporation to respond to changes in economic and/or marketplace conditions by maintaining the Corporation's ability to purchase new investments;
- (b) To provide sustained growth and value by increasing equity; and
- (c) To maintain a flexible capital structure which optimizes the cost of capital at acceptable levels of risk.

The Corporation manages its capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of its underlying assets. The Corporation maintains or adjusts its capital level to enable it to meet its objectives by:

- (a) realizing proceeds from the disposition of its investments;
- (b) utilizing leverage in the form of margin (due from brokers);
- (c) raising capital through equity financings; and,
- (d) borrowing funds in the form of advances from related parties.

The Corporation is not subject to any capital requirements imposed by a regulator. There were no changes in the Corporation's approach to capital management during the year. The Corporation's management is responsible for the management of capital and monitors the Corporation's use of various forms of leverage on a daily basis.

49 North no longer uses margin borrowing as part of its ongoing capital management program. Management expects to maintain a minimal margin borrowing balance in the near-term future. The cash balance at September 30, 2020 was \$61 compared to a cash balance of \$51 at December 31, 2019.

See also the discussion herein concerning financial instruments and related risks under the heading “Financial Instruments” and see the disclosure herein under the heading “Risk Factors” for a detailed discussion of the main risk factors that may have a material effect on the Corporation’s business and on an investment in the securities of 49 North.

Transactions with Related Parties:

TMM Portfolio Management Inc. (“TMM”) is responsible for the management of the Corporation’s investment portfolio in accordance with the terms of a portfolio management agreement made January 1, 2008 (the “Management Agreement”) and is to be reimbursed by the Corporation for all expenses reasonably and properly incurred in conducting the Corporation’s business and in performing its duties and obligations under the Management Agreement. Additionally, pursuant to the Management Agreement, TMM: (a) is entitled to a quarterly management fee equal to 0.5% of the net asset value of the Corporation calculated as of the last business day of the relevant fiscal quarter; and (b) an annual performance bonus, calculated as of the last business day of the applicable fiscal year, in an amount in respect of each common share that is outstanding as of such day, equal to 20% of the amount, if any, by which the sum of the net asset value per common share as of that date, plus all dividends per common share during that fiscal year, exceeds the greater of \$16.34 and the net asset value per common share as of the last business day of the preceding fiscal year.

Effective June 1, 2015, the Company and Jaelky Holdings Inc. (“Jaelky”) entered into a consulting agreement. Mr. Andrew Davidson, the Chief Financial Officer of the Company, was and continues to be the sole director and sole voting shareholder of Jaelky. Jaelky is entitled to be paid a consulting fee of \$20 (2019 - \$20) plus GST on a monthly basis.

As at September 30, 2020, \$101 is receivable (December 31, 2019 – \$nil receivable) from Westcore Energy Ltd., which has been included in loans and advances receivable. The balance is not interest bearing and due on demand. During the year ended December 31, 2019 the Company wrote off the \$500 loan receivable.

As at September 30, 2020, \$15 is receivable (December 31, 2019 – \$nil receivable) from Alstar Energy Ltd., which has been included in loans and advances receivable. The balance is not interest bearing and due on demand. During the year ended December 31, 2019 the Company advanced \$2 to Allstar, which has been written-off.

As at September 30, 2020, \$83 is receivable (December 31, 2019 – \$254 receivable) from OMM, which has been included in loans and advances receivable. The balance is not interest bearing and due on demand.

As at September 30, 2020, \$306 is payable (December 31, 2019 – \$24 payable) to TMM, which has been included in accounts payable and accrued liabilities.

As of September 30, 2020, \$297 is payable (December 31, 2019 - \$178) to Jaelky, which has been included in accounts payable and accrued liabilities.

The Corporation paid or accrued \$541 of consulting fees (2019 - \$321), \$nil of directors’ fees (2019 - \$6) and share based compensation of \$nil (2019 - \$78) to key executive personnel and directors, in the period ended September 30, 2020.

New and Adopted Accounting Pronouncements:

IFRS 16 was issued by the IASB in January 2016 and brings most leases onto the statement of financial position for lessees under a single model, eliminating the distinction between operating and finance leases. Under IFRS 16, a lessee recognizes a right-of-use asset and a lease liability. The right-of-use asset is treated similarly to other non-financial assets and depreciated accordingly, and the liability accrues interest.

Leases

The lease liability is initially measured at the present value of the lease payments payable over the lease term, discounted at the rate implicit in the lease or an entity's incremental borrowing rate if the implicit rate cannot be readily determined. Lessees are permitted to make an election for leases with a term of 12 months or less, or where the underlying asset is of low value and not recognize lease assets and lease liabilities.

The expense associated with these leases can be recognized on a straight-line basis over the lease term or on another systematic basis. A lessee will apply IFRS 16 to its leases either retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying IFRS 16 being recognized at the date of initial application.

The Company has adopted IFRS 16 recognizing the cumulative effect of adoption within opening equity as at January 1, 2019. As at January 1, 2019, the Company recognized a right of use asset and a lease liability of \$292,360 related to its outstanding lease agreements. The Company's lease liabilities were calculated using a discount rate of 15%, which represents the Company's assessed incremental borrowing rate. See Note 7 of the financial statements for disclosure of the Company's lease liabilities and right of use assets at December 31, 2019.

The Company's right of use assets are amortized over the term of the lease.

Income Tax

IFRIC 23 clarifies the application of recognition and measurement requirement in IAS 12, Income Taxes, when there is uncertainty over income tax treatments. It specifically addresses whether an entity considers each tax treatment independently or collectively, the assumptions an entity makes about the examination of tax treatments by taxation authorities, how an entity determines taxable profit (tax loss), tax bases, unused tax credits and tax rates, and how an entity considers changes in facts and circumstances. IFRIC 23 is effective for the Company's first annual reporting period beginning on or after January 1, 2019. The Company adopted IFRIC 23 as at January 1, 2019 with no impact on the Company's financial statements.

There are no other standards, interpretations or amendments to existing standards that are not yet effective that are expected to have a material impact on the Corporation.

Critical Accounting Estimates:

The preparation of the financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the consolidated financial statements and reported amounts of revenues and expenses during the reporting period.

Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

The information about significant areas of estimation uncertainty considered by management in preparing the consolidated financial statements are:

- fair value of investment in securities not quoted in an active market or private Corporation investments;
- the determination of useful lives and residual values of property, plant and equipment;
- the fair value of share-based compensation determined using the Black-Scholes option pricing model using estimates for expected forfeitures, useful life and stock volatility;
- the provision for deferred income taxes based on estimated tax bases using substantively enacted tax rates expected to apply to taxable income during the years in which the differences are expected to be recovered or settled;
- As described in Note 9 of the current financial statements, when the terms of a convertible debentures are modified, it is often accounted for as a de-recognition of the carrying value of the pre-modified loan and the new recognition of a new loan at the then fair value. In the determination of fair value, the

Corporation uses a discounted cash flow technique which includes inputs that are not based on observable market data and inputs that are derived from observable market data. In the case of its convertible debenture modifications, where available, the Corporation seeks comparable interest rates. If unavailable, it uses those considered appropriate for the risk profile of a corporation in the industry; and

- the fair value of the embedded derivative asset is determined using the Black-Scholes option pricing model using estimates of expected life and stock volatility.

In the process of applying the Corporation's accounting policies, management has made the following judgments, which have the most significant effect on the amounts recognized in the financial statements.

- determination of the Corporation meeting the criteria required under IFRS 10 in order to be classified as an investment entity;
- determination of deferred income tax assets or liabilities, which involves subjective assumptions regarding future income tax rates and the likelihood of utilizing tax carry-forwards; and
- valuation techniques for fair value determination of investments in private entities.

Financial Instruments and risk management:

The investment operations of Corporation's business involve the purchase and sale of securities and, accordingly, the majority of the Corporation's assets are currently comprised of financial instruments. The use of financial instruments can expose the Corporation to several risks, including liquidity, market, interest, credit risk and commodity price risks. A discussion of the Corporation's use of financial instruments and their associated risks is provided below.

Liquidity Risk:

Liquidity risk is the risk that the Corporation will have insufficient cash resources to meet its financial obligations as they come due. The Corporation's liquidity and operating results may be adversely affected if the Corporation's access to the capital markets is hindered, whether as a result of a downturn in stock market conditions, generally or related to matters specific to the Corporation, or if the value of the Corporation's investments decline, resulting in losses upon disposition.

The Corporation generates cash flow primarily from its financing activities and proceeds from the disposition of its investments, in addition to interest and dividend income earned on its investments.

The Corporation may use financial leverage (or "margin") when purchasing investments. Trading on margin allows the Corporation to borrow part of the purchase price of the investments (using marginable investments as collateral), rather than pay for them in full. Buying on margin allows the Corporation to increase its portfolio size by increasing the number and amount of investments through leverage. However, if the market moves against the Corporation's positions and the Corporation's investments decline in value, the Corporation may be required to provide additional funds to its brokers.

Given the nature of the Corporation's business, the Corporation may not have sufficient cash on hand to meet margin calls and may be required to liquidate investments prematurely and/or at a loss, in order to generate funds needed to satisfy the Corporation's obligations.

The Corporation has at times borrowed funds from other sources to meet its obligations, but there can be no assurances that such funds will be available in the future, or available on reasonable terms, and the absence of available funding and/or the sale of the Corporation's investments in order to meet margin calls could have a materially adverse impact on the Corporation's operating results. The Corporation manages liquidity risk by reviewing the amount of margin available, and managing its cash flow. The Corporation holds investments which can be readily converted into cash when required.

Market Risk:

Market risk is the risk that the fair value of, or future cash flows from, the Corporation's financial instruments will significantly fluctuate because of changes in market prices. The value of the financial instruments can be affected by changes in interest rates, equity and commodity prices. The Corporation is exposed to market risk in trading its investments and unfavorable market conditions could result in dispositions of investments at less than favorable prices.

The Corporation manages market risk by having a portfolio which is not singularly exposed to any one issuer or class of issuers. The Corporation's investment activities are currently concentrated primarily across several sectors in the natural resource industry, including oil and gas, coal, precious metals, base metals, uranium, diamonds and other commodities.

Interest Rate Risk:

Interest rate risk is the impact that changes in interest rates could have on the Corporation's earnings and liabilities. As at September 30, 2020 and December 31, 2019, the Corporation had no liabilities payable that bear interest at rates fluctuating with the prime rate.

Credit Risk:

Credit risk is the risk associated with the inability of a third party to fulfill its payment obligations. The Corporation is exposed to the risk that third parties that owe it money or securities (in connection with its loans receivable, for example) will not perform their underlying obligations.

The Corporation's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the demographics of the Corporation's customer base, including the default risk of the industry in which the customers operate, as these factors may have an influence on credit risk, particularly in the current economic circumstances.

At September 30, 2020 the Corporation had loans and advances receivable and accounts receivable and prepaid expenses from companies, totaling \$668 (December 31, 2019 - \$673) which represents approximately 2.1% (December 31, 2019 - 4.5%) of the Corporation's total assets. During the period ended September 30, 2020 an impairment loss of \$nil (December 31, 2019 - \$1,202) was recorded.

Commodity Price Risk:

Commodity price risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for base metals, precious metals and petroleum and natural gas are impacted not only by the relationship between the Canadian and United States dollar, but also by world economic events that dictate the levels of supply and demand.

In the past, and from time to time, the Corporation has attempted to mitigate a portion of its commodity price risk through the use of futures contracts. As at September 30, 2020 and December 31, 2019 all futures contracts have been disposed.

Fair Value:

The fair value of the Corporation's financial assets and liabilities approximate their carrying values unless otherwise disclosed in the accounting policies.

Fair value hierarchy and determination of fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability
- In the absence of a principal market, in the most advantageous market for the asset or liability

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Corporation and its subsidiaries uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

The fair value of the financial instruments is included at the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described, as follows, based on the lowest-level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest-level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest-level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis at fair value, the Corporation determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on the lowest-level input that is significant to the fair value measurement as a whole) at the end of each reporting period. The Corporation's assets that are recognized at fair value on a recurring basis are the equity investments.

The following is a summary of the fair value of investments segregated based on the various levels of inputs, as discussed in Note 14 of the financial statements:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Equity investments, at fair value	\$ 22,243	\$ -	\$ 1,318	\$ 23,561
Convertible debenture receivable	-	-	7,906	7,906
	<u>\$ 22,243</u>	<u>\$ -</u>	<u>\$ 9,224</u>	<u>\$ 31,467</u>

For the period ended September 30, 2020, a reconciliation of investments measured at fair value using unobservable inputs (Level 3) is presented as follows:

Beginning balance at December 31, 2019	\$ 1,304
Purchases	14
Fair value adjustments	-
Balance at September 30, 2020	<u>\$ 1,318</u>

Within Level 3, the Corporation includes private company investments and embedded derivative asset. The key assumptions driving the valuation of the private company equity investments include, but are not limited to, the value at which a recent financing was completed by the investee, significant changes in general market conditions

and company specific information. For those investments valued based on general market condition and company specific information, these inputs can be highly judgmental. A +/- 25% change in the fair value of these investments will result in a corresponding +/- \$326 (2019 - \$326) change to the total fair value of the investments. While this illustrates the overall effect of changing the values of the unobservable inputs by a set percentage, the significance of the impact and the range of reasonably possible alternative assumptions may differ significantly between investments, given their different circumstances.

The fair value of the convertible note receivable, which is not traded in an active market, is determined by discounting the stream of future interest and principal repayments at the rate of interest prevailing at the statement of financial position date for instruments of similar term and risk, and adding this value to the value of the convertibility feature which is estimated using a Black-Scholes model based on assumptions including risk free interest rate, expected dividend yield, expected volatility and expected remaining life of the convertible note receivable.

Management estimates that the market interest rate on similar borrowing without the conversion feature was approximately 22% and has used an implied volatility of 150% in valuing the convertibility feature. Holding all other variables constant, a fluctuation in interest rates of 1% would have impacted the valuation by approximately \$155 while a fluctuation in the implied volatility use of 25% would have impacted the valuation by approximately \$22.

The sensitivity analysis is intended to reflect the uncertainty inherent in the valuation of these investments under current market conditions and its results cannot be extrapolated due to non-linear effects that changes in valuation assumptions may have on the fair value of these investments. Furthermore, the analysis does not indicate a probability of such changes occurring and it does not necessarily represent the Corporation's view of expected future changes in the fair value of these investments. Any management actions that may be taken to mitigate the inherent risks are not reflected in this analysis.

Disclosure Controls and Procedures:

There have been no significant changes to the Corporation's internal controls over financial reporting for the most recent period that would have materially affected, or are reasonably likely to materially affect, the Corporation's internal controls over financial reporting. Internal controls are continually being reviewed and assessed.

Risk Factors:

An investment in 49 North involves various risks. The following is a brief discussion of the main risk factors that may have a material effect on our business and on your investment in our common shares. Additional risks not currently known to us or that we currently deem immaterial may also impair our business operations.

Reliance on Management:

Shareholders must rely on the discretion, knowledge and expertise of management of the Corporation and the Portfolio Manager in determining the composition of our investment portfolio, negotiating the pricing of resource securities purchased for or sold from the portfolio and in determining if, when and on what terms to acquire or dispose of portfolio securities.

Risks Associated with Resource Issuers:

In general, our business is to invest in resource issuers, with such investments made predominantly in junior or intermediate resource issuers. There is no assurance that any of the resource issuers in which we invest will prove to be profitable or viable over the short or long term. The resource industries are highly competitive and resource issuers in which we invest must compete with many companies, many of which have far greater financial strength, experience and technical resources. Generally, there is intense competition for the acquisition of resource properties considered to have commercial potential as well as for equipment and personnel necessary to exploit such properties. The business activities of the resource issuers that we invest in are typically speculative and may be

adversely affected by sector specific risk factors, outside the control of the resource issuers, which may ultimately have an impact on our investments in such issuers' securities and/or on an investor's investment in 49 North.

Furthermore, as the Corporation holds some resource properties directly, the Corporation faces some of these risks directly as well as through its exposure from investments in issuers facing these risks. Other risks associated with the resource sector include, without limitation, the following:

(a) The business of exploring for minerals and/or oil and gas involves a high degree of risk, many of which risks are beyond the control of the relevant resource issuer. Many of the resource issuers that we invest in may not hold, discover or successfully exploit commercial quantities of minerals, petroleum or natural gas and/or may not have a history of earnings or payment of dividends.

(b) The marketability of natural resources which may be acquired or discovered by a resource issuer will be affected by numerous factors which are beyond the control of such resource issuer. These factors include market fluctuations in the price of minerals, petroleum and/or natural gas, as applicable, the proximity and capacity of natural resource markets and processing equipment, government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of materials and environmental protection. The exact effect of these factors cannot be accurately predicted, but any one or a combination of these factors could result in a resource issuer not receiving an adequate return for its shareholders.

(c) There are certain risks inherent in the mineral exploration, mining and oil and gas industries, including potential claims arising from operational activities, which may or may not be insurable, or against which a resource issuer may elect not to insure. Such liabilities may have a material, adverse effect on such resource issuer's financial position and on the value of the securities of such resource issuer held as part of our investment portfolio.

(d) Mining and oil and gas operations and the resource industries in general are subject to extensive controls and regulations imposed by various levels of government. In addition to federal regulation, each province has legislation and regulations which govern land tenure, royalties, production rates, environmental protection and other matters. The royalty regime is a significant factor in the profitability of resource production. Royalties payable on production from lands other than Crown lands are determined by negotiations between the mineral owner and the lessee. Crown royalties are determined by government regulation and are generally calculated as a percentage of the value of the gross production, and the rate of royalties payable generally depends in part on prescribed reference prices, productivity, geographical location, discovery date and the type or quality of the commodity produced. Operations may be affected from time to time in varying degrees due to political and environmental developments such as tax increases, expropriation of property and changes in conditions under which resources may be developed, produced, generated and/or exported. Additionally, a resource issuer may have property interests that are located in foreign jurisdictions, and its operations in such jurisdictions may be affected in varying degrees by the extent of political and economic stability, and by changes in regulations or shifts in political or economic conditions that are beyond the control of the resource issuer. Such factors may adversely affect the resource issuer's business and/or its property holdings. Although a resource issuer's activities may be carried out in accordance with all applicable rules and regulations at any point in time, no assurance can be given that new rules and regulations will not be enacted or that existing rules and regulations will not be applied in a manner that could limit or curtail production or development of the resource issuer's operations. Amendments to current laws and regulations governing the operations of a resource issuer or more stringent enforcement of such laws and regulations could have a substantial adverse impact on the financial results of the resource issuer.

(e) The mineral exploration, mining and oil and gas industries are subject to various environmental regulations set by federal and provincial governments. Environmental legislation prescribes restrictions and prohibitions on releases or emissions of various substances produced or utilized in association with certain mining and oil and natural gas operations. Such legislation also prescribes certain requirements for the abandonment and reclamation of mines, wells and other facility sites. A breach of such legislation may result in the imposition on a resource issuer of fines and penalties and/or liability to third parties and may require a resource issuer to incur costs to remedy such breach. In addition, certain types of operations require the submission and approval of environmental impact assessments. Environmental legislation is evolving in a manner which has led to stricter standards and enforcement and greater fines and penalties for non-compliance. No assurance can be given that environmental laws will not

result in a curtailment of production or a material increase in the costs of production, development or exploration activities or otherwise adversely affect the resource issuer's financial condition, results of operations or prospects.

Marketability of Underlying Securities and Related Risks:

The value of our shares fluctuates as a result of numerous factors, including fluctuations resulting from changes in the value of the securities in our investment portfolio. The value of securities in our portfolio is affected by numerous factors such as investor demand, resale restrictions, general market trends or regulatory restrictions. Our investment portfolio generally focuses on junior and intermediate resource companies, with investments made predominantly in resource companies that are listed on the TSXV. However, we may invest in securities of any resource corporation regardless of if or on what stock exchange such securities are listed, regardless of the status or stage of development of the investee corporation's exploration, development or other business activities, and regardless of the size or market capitalization of the investee corporation. A significant portion of our portfolio may at any time be comprised of unlisted securities, including securities acquired under private placements of what are commonly referred to as "founders shares" or "seed-capital shares", securities that may otherwise be issued by a corporation prior to completing feasibility studies including, without limitation, a Form 43-101F1 Technical Report, or securities that may otherwise be issued prior to a resource corporation becoming a "reporting issuer". Investing in relatively smaller companies that are listed on a junior exchange (or are not listed) may be considered to be riskier than investing in securities of relatively larger companies whose securities are listed on a senior exchange such as the TSX. These risks include, without limitation, the following:

(a) The share price of smaller companies is usually more volatile than that of larger, more established companies. Smaller companies may have limited resources, including limited access to funds, and their shares may trade less frequently and in smaller volume than shares of larger companies. They may have fewer shares outstanding, so a sale or purchase of shares will have a greater impact on the share price. The value of these investments may rise and fall substantially.

(b) In general, investments in smaller companies tend to be less liquid than other types of investments. Investments in illiquid securities may be difficult to value accurately and/or may trade at prices significantly lower than their value. In general, the less liquid an investment, the more its market value tends to fluctuate. As a result, we may have difficulty in converting some of our portfolio investments to cash at a fair market price when funds are required or we may incur additional costs in doing so.

(c) The securities of non-reporting issuers that we hold may not be sold unless an exemption is available under applicable securities laws.

More generally, many of the securities held in our investment portfolio, regardless of the industry sector in which the issuer conducts business and including those listed and not subject to resale restrictions, may be relatively illiquid and may decline in price if a significant number of shares are offered for sale.

On the other hand, the potential returns on investment in smaller, relatively early stage companies may be greater than the returns experienced from investment in larger, more established companies.

Conflicts of Interest:

The officers and directors of 49 North have been, are or will be the officers and directors of the general partner of the 49 North Flow-Through Funds and TMM has been, is or will be the portfolio manager of the 49 North Flow-Through Funds. Mr. Tom MacNeill is a director and the President and Chief Executive Officer of the Issuer, and has been, is or will be the sole shareholder, a director and officer of each of the general partners of the 49 North Flow-Through Funds and TMM. Mr. Andrew Davidson is the Chief Financial Officer and Secretary of the Issuer, and has been, is or will be a director and officer of the general partner of the 49 North Flow-Through Funds and TMM. Potential conflicts of interest may arise or be perceived between Mr. MacNeill and Mr. Davidson acting on the one hand in their capacity as a director and officer of the Portfolio Manager and, on the other hand, as a director and officer of the Issuer, and potential conflicts of interest may arise or be perceived between the Issuer and other funds or entities of which the directors and officers of the Issuer may also be directors, officers, or otherwise involved in the management, including but not limited to other members and future members of the 49 North Group.

Investors must appreciate that they are relying on the expertise, good faith and integrity of the officers and directors of the Issuer and the Portfolio Manager, and especially on the expertise, good faith and integrity of Mr. Tom MacNeill and Mr. Davidson, for the success of their investment in the securities of the Issuer. More generally, the services of the officers and directors of the Issuer and of TMM are not exclusive to the Issuer. The officers and directors of the Issuer and their affiliates may engage in activities for their own account which competes with the Issuer. Conflicts may arise from time to time in allocating investment opportunities, timing investment decisions and exercising rights in respect of and otherwise dealing with securities and issuers in which the Issuer and/or the officers and directors of the Issuer and/or their affiliates invest. Potential conflicts of interest may arise in the enforcement of the terms and conditions of agreement between the Issuer on the one hand and the Portfolio Manager (or other persons with whom one or more directors or officers of the Issuer may be associated) on the other hand, whether such agreements are being enforced by or against the Issuer.

Future Roll-over Transactions:

The Issuer has been involved in the establishment of new 49 North Flow-Through Funds, on an annual or more frequent basis, in each year from 2006 to 2012; and each of the 49 North Flow-Through Funds that has been established to date has subsequently completed a transaction (herein referred to as a “Roll-over Transaction”) with 49 North pursuant to which the flow-through units acquired in the 49 North Flow-Through Fund’s own offering were subsequently exchanged for securities of 49 North. We anticipate that new 49 North Flow-Through Funds may be established in the future and that we may enter into agreements to acquire the portfolios of such funds in a proposed Roll-over Transaction. Such agreements are typically subject to various conditions, including, without limitation, the receipt of all necessary regulatory approvals. Accordingly, there is no assurance that a proposed Roll-over Transaction with any particular 49 North Flow-Through Fund will be completed within the time frames contemplated by the relevant agreements, or at all. Further, depending on the methodology used to value the Issuer’s shares and/or the assets of a new 49 North Flow-Through Fund, respectively, for the purpose of a proposed Roll-over Transaction; the size and timing of the new 49 North Flow-Through Fund’s own offering and the length of time between such offering and the completion of a proposed Roll-over Transaction; the requirements of stock exchanges on which 49 North’s shares may then be listed; and other factors which may not be known at this time and/or which may be outside of the control of management, the completion of any particular Roll-over Transaction may be dilutive to the persons who then hold shares of 49 North.

Concentration Risk:

The Corporation invests predominantly in securities of junior and intermediate resource companies engaged in mineral or oil and gas exploration in Canada. Concentrating investments in the resource sector in this manner may result in the value of 49 North’s shares fluctuating to a greater degree than if the Corporation invested in a broader spectrum of issuers or a broader geographical area.

Reliance on Key Persons for Advisory Services:

The Corporation’s performance providing advisory services in merchant banking and geological consulting is strongly correlated to the performance of certain key individuals, and, accordingly, the retention of these individuals is crucial to the Corporation’s revenue from these business segments. Certain of the key individuals have entered into employment agreements or services agreements, however, there is no guarantee that these individuals will not resign or otherwise terminate their agreements.

Reduced Revenues from Advisory Services During Periods of Declining Resource Prices:

The Corporation’s revenues from providing advisory services in merchant banking and geological consulting are likely to be lower during a period of declining natural resource markets and commodity prices. The Corporation’s advisory services are particularly dependent on companies in the natural resource sector and as a result a prolonged period of declining natural resource prices could cause a reduction in fee revenue from advisory services.

Segmented Information:

The Corporation has three reportable segments – resource investing, brokerage and extractive industries.

Outstanding Share Data:

The Corporation is authorized to issue an unlimited number of common shares; an unlimited number of first preferred shares, issuable in series; and an unlimited number of second preferred shares, issuable in series. No series of second preferred shares has been created and, as at the date of this MD&A, no second preferred shares are outstanding. Two series of first preferred shares have been created, being the first preferred series 1 and series 2 shares.

As of the date of this MD&A, the number of securities of the Corporation outstanding is as follows:

Class and Series of Securities	Number or Principal Amount
Common Shares	83,087,229
2.5% Senior Secured Convertible Debentures, Series 1 ¹	\$2,743,925
2.5% Senior Secured Convertible Debentures, Series 2 ²	\$1,824,881
2.5% Subordinated Secured Convertible Debentures ³	\$880,083
First Preferred Series 1 shares ⁴	2,667,713
First Preferred Series 2 shares ⁵	690,996
Options	7,680,000
Notes:	
1. Convertible into 5,487,850 common shares. On June 1, 2015 the Corporation issued \$3,103,795 principal amount of 2.5% senior secure convertible debenture, series 1. The outstanding principal amount of the 2.5% senior secure convertible debenture, series 1 are convertible at the option of the holder, exercisable at any time prior to 5:00 pm (Toronto time) on May 30, 2020 into common shares at a conversion price of \$0.50 per common share.	
2. Convertible into 3,649,762 common shares. On December 18, 2015 the Corporation issued 1,896,204 principal amount of 2.5% senior secure convertible debenture, series 2. The outstanding principal amount of the 2.5% senior secure convertible debenture, series 2 are convertible at the option of the holder, exercisable at any time prior to 5:00 pm (Toronto time) on December 17, 2020 into common shares at a conversion price of \$0.50 per common share.	
3. Convertible into 1,760,166 common shares. On December 18, 2015 the Corporation issued \$880,083 principal amount of 2.5% subordinated secured convertible debentures. The outstanding principal amount of the 2.5% subordinated secured convertible debentures are convertible at the option of the holder, exercisable at any time prior to 5:00 pm (Toronto time) on December 17, 2020 into common shares at a conversion price of \$0.50 per common share.	
4. Convertible into 5,335,426 common shares. On June 1, 2015 the Corporation issued 3,103,795 first preferred series 1 shares. The first preferred series 1 shares are convertible, at the owner's option, into common shares at a conversion price of \$0.50 per common share.	
5. Convertible into 1,381,992 common shares. On December 18, 2015 the Corporation issued 767,663 first preferred series 2 shares. The first preferred series 2 shares are convertible, at the owner's option, into common shares at a conversion price of \$0.50 per common share.	
6. On a fully diluted basis, there are 108,382,425 common shares.
